

Recruit, Ramp, and Retain a Best-In-Class Workforce

Drive Rapid Growth and Scale

Your technicians are your greatest revenue generators - the economic engine of your business. Without them, it's impossible to reach your goals.

That's why good training is essential to their growth and, ultimately, the long-term success of your business.

To drive rapid growth, you need a solution that is scalable, highly effective, and fits seamlessly into your existing training program. Interplay's training is:

- **Repeatable:** Scale easily and drive consistency across various locations, assess the skill levels of all of your technicians, and utilize customized learning pathways to ramp new locations quickly.
- **Integrated:** Blend Interplay seamlessly into your existing program and/or LMS to help you elevate your training program for better outcomes and improved performance.
- **Effective:** Ramp new techs quickly and help experienced techs grow their skills safely with hands-on 3D simulations and virtual reality.

Take Your Talent to the Next Level

To grow your business, you need to invest in and grow the technical skills of your employees. But with a lack of resources and consistency across locations, it's hard to assess and identify those gaps.

Interplay Learning offers powerful management resources and technical training to enhance what you already have in place, empowering you to develop and maintain a high-performing workforce.

- **Assess Skill Levels:** Get an in-depth view of your team's abilities and identify gaps - by person, office, region. Use assessments to document and hold all new hires to a specific standard.
- **Improve Hiring Decisions:** Use assessments to gauge technical acumen across your entire company to improve hiring decisions and custom training plans for all technicians.
- **Increase Your Bottom Line:** Reduce callbacks and third-party calls by upskilling and cross-training technicians at every level.
- **Boost Productivity:** Training with online 3D simulations and VR - in a no-fail environment - can lead to faster troubleshooting and fewer OTJ mistakes, increasing technician performance.

What Interplay Learning Customers Are Saying

70% of customers increased employee retention

Customized Training Based on Your Goals

There is no one-size-fits-all approach to training. Interplay works with you to drive your desired usage and solve real problems. Here are five actionable ways you can enhance your learning culture to drive actionable results:

- **Ramp and Onboard Paths:** Set consistent standards by having all techs go through the same ramp process
- **Promotion and Raise Paths:** Promote and incentivize techs by rewarding new skills or cross training
- **Certification Paths and Safety:** Help techs prepare for NATE, EPA 608, OSHA 10, DOL, Apprenticeships, and CEU's
- **Address Problem Areas:** Identify high-cost scenarios and address points of priority
- **Collaborative Training Tools:** Leverage 3D and VR technology to build your brand and your team
