

Measure and Monitor with Actionable Insights and Flexible Reporting

Achieve Training Success with Powerful Insights Tools

There isn't a one-size-fits-all approach to training. The way teams learn is just as important as what they learn--everyone has different strengths and weaknesses. In order to develop a more targeted and efficient learning experience for your team, you need access to relevant data about how engaged they are with training and their skill development over time.

Interplay's immersive career development platform and suite of powerful measurement tools is designed to support your talent and training decisions by giving you the ability to test your teams' technical abilities, review core competencies, customize learning, and drive continuous improvement all in one place.

Assess, Track, and Develop Your Teams' Skills

Get an inside look at how engaged and proactive your teams are and assign recommended training based on skills and goals progress.

Access On-Demand, Flexible Reporting

Make better decisions on and off the platform by accessing relevant team data quickly with flexible reporting. Create, download, and schedule custom reports based on your training goals.

Capture and Present Relevant Assessment Data

Test your team's technical abilities through simulation and skills assessments and get a read out of their skills, safety, quality, and accuracy for each step in their process with Interplay's assessment data.

Integrate Reporting Data Into Your Own System

Integrate powerful data from Interplay's career development platform into your system(s) via API to store your data in one place.

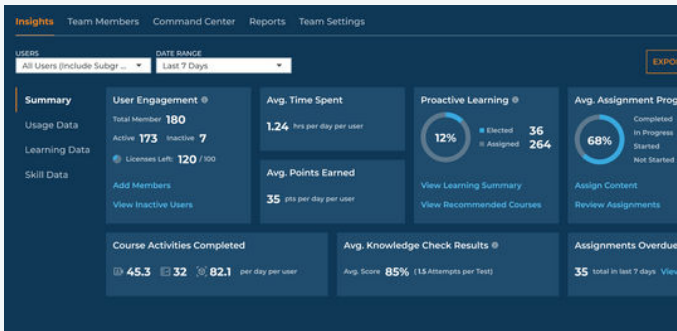

Trusted by 1,800+ Companies and 240,000+ Learners

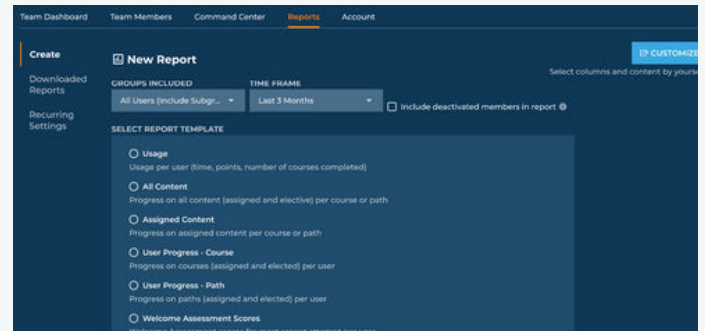

Your Suite of Actionable Insights and Reporting Tools

Say goodbye to one-size-fits-all training and hello to impactful skill development. Tap into Interplay’s suite of insights and reporting tools to gauge the technical acumen of your team and provide a more targeted, efficient learning experience.
