

# Develop and Retain a Best-in-Class Facilities Maintenance Team

## Online, Hands-On Training for Facilities Maintenance Teams

Interplay Learning's career development platform includes over 450 hours of expert-led HVAC, plumbing, electrical, and safety courses as well as hands-on simulations and powerful management resources, helping you develop and upskill your maintenance team, boost productivity, and drive long-term business success.

With Interplay, you get training that is:

- **Repeatable:** Scale your training easily and drive consistency across your maintenance and custodial teams as well as your entire organization
- **Integrated:** Blend Interplay seamlessly into your existing program to elevate your training program for better outcomes and improved performance
- **Effective:** Ramp and upskill your entire team safely and effectively with hands-on 3D simulations that your team actually wants to use

## Effective Training that Empowers Your Team

Driving training consistency, especially at scale, is not an easy job—it's time-consuming, difficult to assess skill levels and core competencies, and likely requires many resources to tailor content. Interplay gives you the tools you need to overcome these challenges and help workers succeed.

- Assess your team's skill levels, identify gaps, and hold all new hires to your company standard
- Provide your team with custom roadmaps that put learners in front of the most relevant training courses, in the correct order
- Enable your maintenance team to visualize their growth by creating career paths and cross-training opportunities
- Deliver scalable training and drive learning consistency across your entire organization
- Give your team the ability to practice in safe, "real-world" scenarios where they can learn hands-on and improve troubleshooting skills
- Reduce third-party outsourcing expenses by upskilling and cross-training your team

## Training Wherever Your Team Goes

Give your maintenance teams the opportunity to expand their knowledge and skills by delivering standardized, scalable training that can be accessed anytime, anywhere – on any device.

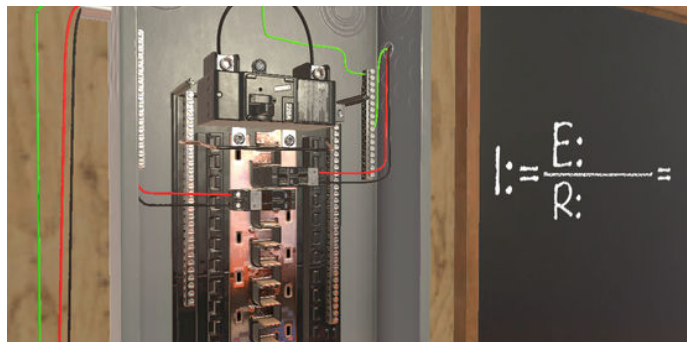

## Consider a One-Stop-Shop for Facilities Maintenance Training

Ranging from preventive and seasonal maintenance scenarios, to diagnostic and repair work on a number of different commercial systems, you can offer your maintenance team a wide range of training options and provide them with continuous skill development opportunities.

### Mechanical

- AC System Tools
