

Prove Readiness Before Work Begins with Skill Verification

Verify Readiness. Reduce Risk.

Skill Verification from Interplay Learning helps you determine who is ready to perform tasks before work begins. Workers demonstrate their skills in an interactive 3D simulation that reflects real-world equipment, procedures and working conditions. Managers receive overall results and step-level performance data to support training and operational decisions.

Every worker completes the same scenario and is evaluated against the same criteria, creating a consistent standard for job readiness based on demonstrated performance.

- **Improve efficiency:** Verify workers can perform critical tasks to prevent rework and incidents.
- **Shorten in-person evaluations:** Show managers which steps still need to be observed.
- **Reduce risk:** Verify that workers can perform procedures correctly before dispatch or authorization.
- **Identify skill gaps with precision:** Get visibility into where workers struggle and need training.

Roll Out Faster. Scale Easier.

Choose from a ready-to-deploy catalog of Skill Verification assessments covering electrical safety, industrial controls, motors, mechanical systems HVAC/R diagnostics, and more.

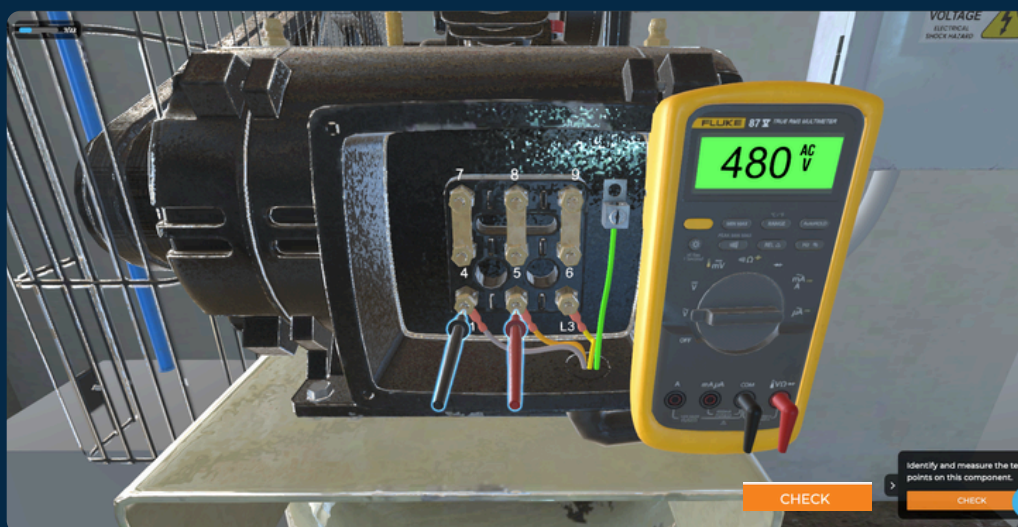

Use assessment paths to verify skills needed across your organization, including specific disciplines, job roles, asset or equipment types.

Get Everything You Need

- 20 ready-to-deploy simulation-based assessments
- Step-by-step performance tracking
- Objective, consistent skill validation
- Scalable deployment across teams and locations
- Mobile-friendly access from anywhere
- Integration with Interplay's learning environment or your LMS

Verify Real World Skills

Use simulation-based assessments that show how work is performed

Turn Proof Into Action

- **New Hire Placement:** Start workers at the right level.
- **Dispatch Authorization:** Assign the right person.
- **Contractor Qualification:** Approve site access with confidence.
- **Role Progression:** Create a clear progression path.

Interplay Skill Verification Assessment Catalog

Verify Skills Across Disciplines, Assets and Roles

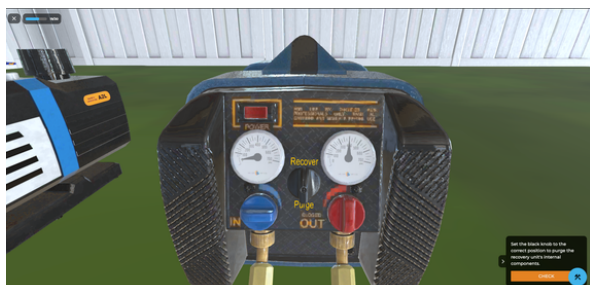

Discipline

- Electrical Safety
- Industrial Controls and Automation
- Motor Troubleshooting
- HVAC and Refrigeration
- Mechanical Systems

Equipment

- Electrical Safety and Test Equipment
- PLCs, Drives, and Control Circuits
- Motors and Motor-Driven Equipment
- Commercial HVAC/R Equipment

Job Roles

- HVAC Service Tech
- Commercial Refrigeration Tech
- Facilities Maintenance Tech
- Industrial Maintenance Tech
- Industrial Electrician

Industry

- Commercial Facilities
- HVAC
- Data Centers
- Manufacturing and Industrial Facilities

Don't See What You Need?

Interplay can create customized skill verification assessments tailored specifically for your operation.
